The Asplundh Cancer Pavilion provides the latest treatments and access to clinical trials, as well as support services to ensure that each patient receive the best possible care. Our medical oncologists, cancer surgeons, radiation oncologists, hematologists, pathologists and interventional radiologists are experienced in providing the highest quality diagnostics, treatment and ongoing care.

The team approach at The Asplundh Cancer Pavilion draws professionals from various disciplines within cancer treatment and other medical specialties throughout Abington Hospital. These highly skilled experts work together to provide the personal focus that is so important for cancer care, whether delivered as outpatient therapy, in our inpatient oncology unit or at home.

Through our Evaluation Services Program, patients can take advantage of a multidisciplinary team of physicians who will discuss their diagnosis and treatment recommendations. Some patients use this free service when seeking a second opinion.

Because some therapies can be complicated and patients may need to juggle frequent office visits, testing appointments, treatment sessions and more, our specially trained nurse navigators help make the experience go more smoothly. These navigators are available to answer questions, assist with concerns or offer guidance.

The Asplundh Cancer Pavilion has been evaluated and honored with accreditation by the Commission on Cancer of the American College of Surgeons. Such official recognition assures patients that our center meets the highest national standards for prevention, early detection, diagnosis and treatment. Our center was selected as a Blue Distinction Center for Complex and Rare Cancers. This designation was given for our demonstrated depth of multidisciplinary expertise and experience treating 14 rare cancers, such as thyroid, liver and bladder cancer.
