

Celebrating nursing excellence. The Magnet Prize

We are overwhelmed and honored to have received The Magnet Prize. Abington is one of just six hospitals in the country (including the Mayo Clinic) to ever receive this prestigious award for innovation in nursing practice. We won for our Daily CARE Plan, an information sheet written in layperson language that is given to our patients each day. It includes a list of medications they are receiving, procedures and tests scheduled for the day, a list of allergies, and advance directives.
