

JONAS J. GOPEZ, MD

Neurosurgery

Neurosurgical Associates of Abington
Abington Health Physicians

Jonas J. Gopez, MD, is board certified in neurosurgery. After earning his medical degree from Jefferson Medical College, Dr. Gopez completed his internship in surgery at the Johns Hopkins Hospital and his residency in Neurosurgery at Temple University Hospital. Dr. Gopez's area of practice and research interests include

traumatic brain injury, spinal trauma, complex spinal surgery, sacroiliac joint fusion surgery, neuromodulation procedures for pain management and brain tumor surgery. Dr. Gopez is part of the Abington Hospital's Division of Neurosurgery and is a proud member of the Abington Health Physicians.

The Neurosurgery Division of Abington Hospital offers high quality surgical treatment of the nervous system including but not limited to surgery of the brain, spine, and peripheral nerves using state-of-the-art technology. Neurosurgeons work with specialty trained nurses and professional supporting staff throughout the entire treatment process to insure the highest quality care is given.

The Neurosciences Institute signifies the importance of and expertise in the diagnosis and treatment of a wide range of neurological conditions available at Abington - Jefferson Health. An evolution in services and the continuous growth in the depth of the physicians on the neurosciences team have put us at the forefront in the treatment of disorders of the brain, spinal and peripheral nerves. Neurosciences Institute specialists include:

- Five full-time neurosurgeons providing advanced nervous system care.
- Neurosurgeons specially trained in the most recent advances in spine surgery.
- Our growing Division of Neurology providing sub-specialty care for patients who have experienced a stroke or suffer from disorders of the nervous system including Multiple Sclerosis, balance and movement disorders such as Parkinson's Disease, epilepsy, neuropathy or chronic and severe migraine headaches.
- Partnership with the Asplundh Cancer Pavilion to render the highest level of care for neuro-oncology patients.

Background
